## WHO WE ARE

- The Wisconsin Water Well Association (WWWA), a trade association of well drillers, pump installers, manufacturers and suppliers, was established over 60 years ago.
- Our mission is simple: to provide and protect Wisconsin's most precious resource, groundwater.
- Our purpose is to increase the industry's knowledge and understanding of proper drilling, pump installation, and well filling and sealing techniques.
- WWWA represents over 1,300 licensed well drillers & pump installers.

## NINE REASONS TO BELONG

1. Membership benefits: insurance, media kit, triannual newsletter, continuing education and much more.
2. Web presence: With more than 6,440 visitors a month, our website is the perfect tool to drive business to members.
3. Cooperate and affiliate with other organizations in related industries for the advancement of the water well industry.
4. Advise and assist in the enactment and enforcement of equitable laws and regulations that deal justly with the rights of parties interested in, and affected by, the water well industry.
5. Promote professionalism within the industry.
6. Aid in the establishment and enforcement of equitable laws, rules, and regulations for the transaction of business among members.
7. Encourage and promote research pertaining to the water well industry.
8. To secure and disseminate among members information relative to the operation and management of the water well industry.
9. Promote and protect the interests of the groundwater industry.
