AGENDA

LIMITED SPACE, REGISTER EARLY!

7:00am – 8:00am
Check-in/registration
Light snacks and coffee

8:00am – 10:00am
Groundwater Quality and Quantity Issues in Wisconsin
John A. Luczaj, Professor of Geoscience, Dept of Natural & Applied Sciences, University of Wisconsin – Green Bay
This will provide relevant information to pump installers, well drillers, and heat exchange drillers, regarding groundwater quantity and quality concerns in a geological context. Statewide geology will be discussed, including the impacts from local geology and land use in areas of the state with significant water quality issues.

10:00am – 11:00am
Pressure Systems, Well & Heat Exchange Borehole Separation Distances
WWWA Board Members
This session will discuss changes to current setbacks, new setbacks and distances between water wells and contaminate sources. Knowing setbacks and separation distances is important for deciding where to drill a well and for performing inspections.

11:00am – 12:00pm
High Capacity Well Approval Applications
Jeff Kramer, Retired Hydrogeologist
This session is to familiarize the applicant with the application and the Wisconsin Department of Natural Resources (WDNR) review process of the submitted application. The session is also designed to aid in the filling out of the actual approval application.

12:00pm – 1:00pm
Lunch

1:00pm – 3:00pm
Bacti/Nitrate/Arsenic Testing & Treatment
Michael Hanten, Lab Director/General Manager, Clan Water Testing
Well drillers and pump installers are required to collect these water samples every day, and often face questions from their customers regarding them. This course will provide much needed information to help well drillers and pump installers properly complete their water testing requirements.

Send Registration information below with payment to WWWA Office.

ATTENDEE REGISTRATION INFORMATION
